## GUIDANCE FOR AUTHORS

**Aims and Scope** *Biodiversitas*, *Journal of Biological Diversity* or *Biodiversitas* encourages submission of manuscripts dealing with all aspects of biodiversity, including plants, animals, and microbes at the level of the gene, species, and ecosystem. Ethnobiology papers are also considered.

**Article types** The journal seeks original full-length: (i) **Research papers**, (ii) **Reviews**, and (iii) **Short communications**. Original research manuscripts are limited to 8,000 words (including tables and figures) or proportional to articles in this publication number. Review articles are also limited to 8,000 words, while Short communications should be less than 2,500 words, except for pre-study.

**Submission:** The journal only accepts online submissions through the open journal system (<https://smujo.id/biodiv/about/submissions>) or email the editors at [unsjournals@gmail.com](mailto:unsjournals@gmail.com). Submitted manuscripts should be the original works of the author(s). Please ensure that the manuscript is submitted using the *Biodiversitas* template, which can be found at (<https://biodiversitas.mipa.uns.ac.id/D/guidance.htm>). The manuscript must be accompanied by a cover letter containing the article title, the first name and last name of all the authors, and a paragraph describing the claimed novelty of the findings versus current knowledge. Please also provide a list of five potential reviewers in your cover letter. Submission of a manuscript implies the submitted work has not been published (except as part of a thesis or report, or abstract) and is not being considered for publication elsewhere. When a group writes a manuscript, all authors should read and approve the final version of the submitted manuscript and its revision; and agree on the submission of manuscripts for this journal. All authors should have made substantial contributions to the concept and design of the research, acquisition of the data and its analysis, drafting the manuscript, and correcting the revision. All authors must be responsible for the work's quality, accuracy, and ethics.

**Ethics** Author(s) must be obedient to the law and/or ethics in treating the object of research and pay attention to the legality of material sources and intellectual property rights.

**Copyright** If the manuscript is accepted for publication, the author(s) still hold the copyright and retain publishing rights without restrictions. Authors can reproduce articles as long as they are not used for commercial purposes. For the new invention, authors must manage its patent before publication.

**Open Access** The journal is committed to free-open access that does not charge readers or their institutions for access. Readers are entitled to read, download, copy, distribute, print, search, or link to the full texts of articles, as long as not for commercial purposes. The license type is CC-BY-NC-SA.

**Acceptance** Only articles written in US English are accepted for publication. Manuscripts will be reviewed by editors and invited reviewers (double-blind review) according to their disciplines. Authors will generally be notified of acceptance, rejection, or need for revision within 1 to 2 months of receipt. Manuscripts will be rejected if the content does not align with the journal scope, does not meet the standard quality, is in an inappropriate format, or contains complicated grammar, dishonesty (i.e., plagiarism, duplicate publications, fabrication of data, citations manipulation, etc.), or ignoring correspondence in three months. The primary criteria for publication are scientific quality and biological significance. **Uncorrected proofs** will be sent to the corresponding author by email as .doc or .docx files for checking and correcting typographical errors. The corrected proofs should be returned in 7 days to avoid publication delays. The accepted papers will be published online in chronological order at any time but printed at the end of each month.

**A charge** Authors are charged USD 320 (IDR 4,500,000). Additional charges may be billed for language improvement, USD 75-150 (IDR 1,000,000-2,000,000).

**Reprints** The sample journal reprint is only available by special request. Additional copies may be purchased when ordering by email and sending back the uncorrected proofs. **Manuscript preparation** Manuscript is typed on A4 (210x297 mm<sup>2</sup>) paper size, in a single column, single space, 10-point (10 pt) Times New Roman font. The margin text is 3 cm from the top, 2 cm from the bottom, and 1.8 cm from the left and right. Smaller lettering sizes can be applied in presenting tables and figures (9 pt). Word processing program or additional software can be used; however, it must be PC compatible, use the *Biodiversitas* template, and be Microsoft Word based (.doc or .rtf; not .docx). **Scientific names** of species (incl. subspecies, variety, etc.) should be written in italics, except in italicized sentences. Scientific names (genus, species, author) and cultivar or strain should be mentioned completely for the first time mentioning it in the body text, especially for taxonomic manuscripts. The Genus name can be shortened after the first mention, except where this may generate confusion. name of the author can be eliminated after the first mention. For example, *Rhizopus oryzae* L. UICC 524 can be written hereinafter as *R. oryzae* UICC 524. Using trivial names should be avoided. **Biochemical and chemical nomenclature** should follow the order of the IUPAC - IUB. For DNA sequences, it is better to use Courier New font. Standard chemical abbreviations can be applied for common and clear used, for example, completely written butilic hydroxyl toluene (BHT) to be BHT hereinafter. **Metric measurements** should use IS denominations, and other systems should use equivalent values with the denomination of IS mentioned first. A dot should not follow abbreviations like g, mg, mL, etc. Minus index (m<sup>-2</sup>, L<sup>-1</sup>, h<sup>-1</sup>) suggested being used, except in things like "per-plant" or "per-plot." **Mathematical equations** can be written down in one column with text;

in that case, they can be written separately. **Numbers** one to ten are written in words, except if it relates to measurement, while values above them are written in number, except in early sentences. The fraction should be expressed in decimal. In the text, it should be used "%" rather than "percent." Avoid expressing ideas with complicated sentences and verbiage/phrasing, and use efficient and effective sentences.

The **article's title should be written in a** compact, clear, and informative sentence, preferably not more than 20 words. Author name(s) should be completely written. Name and institution address should also be completely written with street name and number (location), postal code, telephone number, facsimile number, and email address. Manuscripts written by a group, author for correspondence, and address are required. The first page of the manuscript is used for writing the above information.

The **Abstract** should not be more than 200 words. Include between five and eight **Keywords**, using scientific and local names (if any), research themes, and special methods used, and sorted from A to Z. All important **abbreviations** must be defined at their first mention. The running title is about five words. The **Introduction** is about 400-600 words, covering the background and aims of the research. **Materials and Methods** should emphasize the procedures and data analysis. **Results and Discussion** should be written as a series of connecting sentences; however, manuscripts with long discussions should be divided into subtitles. Thorough discussion represents the causal effect that mainly explains why and how the research results occurred and did not only re-express the mentioned results in sentences. A **Conclusion** should be given at the end of the Discussion. Finally, **acknowledgments** are expressed in brief; all sources of institutional, private, and corporate financial support for the work must be fully acknowledged, and any potential conflicts of interest must be noted.

**Figures and Tables** of three pages maximum should be clearly presented. Include a label below each figure and above each table (see example). Colored figures can only be accepted if the manuscript's information can be lost without those images; the chart is preferred to use black and white images. The author could consign any picture or photo for the front cover, although it does not print in the manuscript. All images property of others should be mentioned as sources. Although there is no **Appendix**, all data or data analysis is incorporated into Results and Discussions. For comprehensive/broad data, supplementary information can be provided on the website.

**References** In the text, give the author names followed by the year of publication and arrange from oldest to newest and from A to Z; in citing an article written by two authors, both of them should be mentioned; however, for three and more authors only the first author is mentioned followed by et al. For example, Saharjo and Nurhayati (2006) or (Boonkerd 2003a, b, c; Sugiyarto 2004; El-Bana and Nijjs 2005; Balagadde et al. 2008; Webb et al. 2008). Extent citation should be avoided, as shown with the word "cit." Reference to unpublished data and personal communication should not appear in the list but should be cited in the text only (e.g., Rifai MA 2007, pers. com. (personal communication); Setyawan AD 2007, unpublished data). In the reference list, the references should be listed in alphabetical order. Names of journals should be abbreviated. Always use the standard abbreviation of a journal's name according to the **ISSN List of Title Word Abbreviations** ([www.issn.org/2-22661-LTWA-online.php](http://www.issn.org/2-22661-LTWA-online.php)). Please include DOI links for journal papers. The following examples are for guidance.

### Journal:

Saharjo BH, Nurhayati AD. 2006. Domination and composition structure change at hemic peat natural regeneration following burning; a case study in Pelalawan, Riau Province. *Biodiversitas* 7: 154-158. DOI: 10.13057/biodiv/d070213

### Book:

Rai MK, Carpinella C. 2006. Naturally Occurring Bioactive Compounds. Elsevier, Amsterdam.

### Chapter in the book:

Webb CO, Cannon CH, Davies SJ. 2008. Ecological organization, biogeography, and the phylogenetic structure of rainforest tree communities. In: Carson W, Schnitzer S (eds.). *Tropical Forest Community Ecology*. Wiley-Blackwell, New York.

### Abstract:

Assaeed AM. 2007. Seed production and dispersal of *Rhazya stricta*. 50th annual symposium of the International Association for Vegetation Science, Swansea, UK, 23-27 July 2007.

### Proceeding:

Alikodra HS. 2000. Biodiversity for development of local autonomous government. In: Setyawan AD, Sutarno (eds.). *Toward Mount Lawu National Park; Proceeding of National Seminary and Workshop on Biodiversity Conservation to Protect and Save Germplasm in Java Island*. Universitas Sebelas Maret, Surakarta, 17-20 July 2000. [Indonesian]

<b>Molecular and morphological characterization of fungi isolated from nutmeg (<i>Myristica fragrans</i>) in North Sulawesi, Indonesia</b> FITRI ARIFAH, LUQMAN QURATA AINI, ANTON MUHIBUDDIN	441-453

<b>Cultivation of underutilized fruit trees by indigenous people in Urug Village, West Java, Indonesia</b> ANISA ANGGRAENI, RATNA YUNIATI, MARINA SILALAH, RETNO LESTARI, JUMARI	<b>454-466</b>
<b>Using biodiversity indices to assess the current state of tugai vegetation of the Amu Darya River, Uzbekistan</b> NODIRA K. RAKHIMOVA, KHABIBULLO F. SHOMURODOV, VASILA K. SHARIPOVA, UMIDA SH. SAITJANOVA, JASUR S. SADINOV	<b>467-472</b>
<b><i>Limnonectes</i> from Enggano Island (Indonesia) with comments on its taxonomic status</b> ADE DAMARA GONGGOLI, VESTI ATMAJAYA, AHMAD MUAMMAR KADAFI, EVY AYU ARIDA, AMIR HAMIDY	<b>473-480</b>
<b>Antibacterial activity of ethanol extract of banana, cassava, and pineapple peels against a fish pathogen <i>Aeromonas hydrophila</i></b> DINI SISWANI MULIA, RAIH RAICHA, CITRA PUSPANING LUNGGANI, SISKANUR ERINA, JULI ROCHMIJATI WULIANDARI, CAHYONO PURBOMARTONO, ALIM ISNANSETYO	<b>481-485</b>
<b>The evidence of cloaca display as an indicator to validate breeding behavior during the matchmaking phase on Local Indonesia female White-rumped Shama (<i>Copsychus malabaricus</i>)</b> HERI DWI PUTRANTO, NURMEILIASARI, AHMAD SALEH HARAHAP, BIENG BRATA, SUTRIYONO, YOSSIE YUMIATI	<b>486-491</b>
<b>Population dynamics of <i>Spirostachys africana</i> Sond. a species highly exploited amongst some communities of Limpopo Province, South Africa</b> PHALANNDWA MASHUDU VICTOR, MILINGONI PETER TSHISIKHAWE, KHATHUTSHELO MAGWEDE	<b>492-497</b>
<b>Morphological characteristics and biodiversity of mudskipper fish (<i>Periophthalmus: Gobiidae</i>) in mangrove ecosystem of coastal Bay of Tomini, Boalemo, Gorontalo Province, Indonesia</b> DEWI WAHYUNI K. BADERAN, REGINA VALENTINE AYDALINA, MARINI SUSANTI HAMIDUN	<b>498-507</b>
<b>Utilization of farmer priority on local beef cattle development strategy in Central Java, Indonesia</b> RESTIYANA AGUSTINE, MUJTAHIDAH ANGGRIANI UMMUL MUZAYYANAH, AHMAD ROMADHONI SURYA PUTRA, ENDANG BALIARTI	<b>508-515</b>
<b>Characterization of microplastic in trawl fish caught in Padang City (Indonesia) coastal area</b> TIVANY EDWIN, BUDHI PRIMASARI, ANNISA PURNAMA R	<b>516-522</b>
<b>The development of <i>Spodoptera frugiperda</i> J.E. Smith (Lepidoptera: Noctuidae) on several varieties of maize</b> NOVRI NELLY, H. HAMID, E.C. LINA, YUNISMAN, YAHERWANDI, Y.D. PUTRI	<b>523-530</b>
<b>Confirmation of mutation and genetic stability of the M4 generation of chili pepper's (<i>Capsicum frutescens</i> L.) Ethyl Methane Sulfonate (EMS) mutant based on morphological, physiological and molecular characters</b> ESTRI LARAS ARUMINGTYAS, ATIATURROCHMAH, JONI KUSNADI	<b>531-538</b>
<b>The variability influence of physico-chemical parameters on macroinvertebrate assemblages in the Rhumel and Endja rivers, Algeria</b> SALIHA KHERIEF-NACEREDDINE, HAMSSA DJEDDI, BENAYACHE NAÏLA-YASMINE, SABAH BOUKERIA, ZOUBIDA BENMAKHOULOUF, FATIMA-ZOHRRA MEHENNAOUI-AFRI	<b>539-550</b>
<b>Vegetation composition, diversity, stand structure and carbon stock of a dry evergreen montane forest of Lendikinya forest reserve in Tanzania</b> MPONIE LEISON MWALUSEKE, EZEKIEL EDWARD MWAKALUKWA, SALIM MOHAMMED SALIM MALIONDO	<b>551-562</b>

<b>Sperm osteopontin mRNA expression levels and its correlation on semen quality and fertility in Madura bulls</b>	<b>563-570</b>
ZULFI NUR AMRINA ROSYADA, VINCENTIA TRISNA YOELINDA, EKAYANTI MULYAWATI KAIIN, MUHAMMAD GUNAWAN, MOKHAMAD FAKHRUL ULUM, LIGAYA I.T.A TUMBELAKA, DEDY DURYADI SOLIHIN, MUHAMMAD AGIL, ASEP GUNAWAN, BAMBANG PURWANTARA	
<b>Nutraceuticals and bioactive properties of local Java pigmented rice</b>	<b>571-582</b>
SANDI PRADIPTA, SITI NABILAH, AGUNG NUGROHO PUSPITO, TRI AGUS SISWOYO, MOHAMMAD UBADILLAH	
<b>Biophysical assessment of the plant biodiversity of Northern Negros Natural Park, Negros Island, Philippines</b>	<b>583-602</b>
ARAGON A. DECHIMO JR., INOCENCIO E. BUOT JR.	
<b>Phytochemical analysis of <i>Annona atemoya</i> seed extract by HPLC and their ability to inhibit the growth of <i>Agrobacterium tumefaciens</i></b>	<b>603-608</b>
NAJWA IBRAHIM KHALEEL AL-BARHAWEE, WIJDAN SALIM QASIM, YOUSRA A. ABDLLA	
<b>Ethnobotanical identification of mango (<i>Mangifera indica</i> L.) and other fruit trees mentioned in Old Javanese Ramayana (10th century Java, Indonesia)</b>	<b>609-616</b>
DEDE MULYANTO, BUDIAWATI SUPANGKAT, HARDIAN E. NURSETO, JOHAN ISKANDAR	
<b>Genetic diversity and phylogenetic study of Ongole Grade cattle population in Central Java based on blood protein polymorphism</b>	<b>617-624</b>
DELA AYU LESTARI, SUTOPO, ASEP SETIAJI, EDY KURNIANTO	
<b>Ecolichenology of Eastern Ghats diversity against climatic fluctuations in Kolli Hills, India</b>	<b>625-635</b>
RUBAVATHI SUBBAIYAN, AYYAPPADASAN GANESAN, SARANYA DHANUSKODI	
<b>Public choice for payment vehicles of turtle conservation in Terengganu, Malaysia</b>	<b>636-644</b>
MAHIRAH KAMALUDIN, ROSELIZA MAT ALIPIAH, NIK SALBIAH NIK NORDIN, NURAIN AFIQAH	
<b>Local knowledge and the utilization of non-medicinal plants in home garden by the people of Donorejo Village in the Menoreh Karst Area, Purworejo, Central Java, Indonesia</b>	<b>645-657</b>
AINI MAR'ATUSH SHOLEKHA, INGGRID TRIFENA YULIA, ZAHRA HANUN, IYUALEVI GARNIS PERWITASARI, AGUSTINA PUTRI CAHYANINGSIH, SUNARTO, SUTARNO, SUGIYARTO, INOCENCIO E. BUOT JR., AHMAD DWI SETYAWAN	
<b>Detection of multidrug-resistant <i>Staphylococcus aureus</i> and coagulase-negative staphylococci in cow milk and hands of farmers in East Java, Indonesia</b>	<b>658-664</b>
ASWIN RAFIF KHAIRULLAH, SHENDY CANADYA KURNIAWAN, SRI AGUS SUDJARWO, MUSTOFA HELMI EFFENDI, DANIAH ASHRI AFNANI, OTTO SAHAT MARTUA SILAEN, GIOVANNI DWI SYAHNI PUTRA, KATTY HENDRIANA PRISCILIA RIWU, AGUS WIDODO, SANCAKA CHASYER RAMANDINIANTO	
<b>Potential antibacterial and antioxidant activities of ten essential oils from East Kalimantan, Indonesia</b>	<b>665-672</b>
FARIDA ARYANI, IRAWAN WIJAYA KUSUMA, YENNY MELIANA, NUR MAULIDA SARI, HARLINDA KUSPRADINI
