GUIDANCE FOR AUTHORS

Aims and Scope *Biodiversitas*, *Journal of Biological Diversity* or *Biodiversitas* encourages submission of manuscripts dealing with all aspects of biodiversity, including plants, animals, and microbes at the level of the gene, species, and ecosystem. Ethnobiology papers are also considered.

Article types The journal seeks original full-length: (i) **Research papers**, (ii) **Reviews**, and (iii) **Short communications**. Original research manuscripts are limited to 8,000 words (including tables and figures) or proportional to articles in this publication number. Review articles are also limited to 8,000 words, while Short communications should be less than 2,500 words, except for pre-study.

Submission: The journal only accepts online submissions through the open journal system (<https://smujo.id/biodiv/about/submissions>) or, for login problems, email the editors at unsjournals@gmail.com (or editors@smujo.id). Submitted manuscripts should be the original works of the author(s). Please ensure that the manuscript is submitted using the template, which can be found at (<https://biodiversitas.mipa.uns.ac.id/D/template.doc>). The manuscript must be accompanied by a cover letter containing the article title, the first name and last name of all the authors, and a paragraph describing the claimed novelty of the findings versus current knowledge. Please also provide a list of five potential reviewers in your cover letter. They should come from outside your institution and better from three different countries. Submission of a manuscript implies the submitted work has not been published (except as part of a thesis or report, or abstract) and is not being considered for publication elsewhere. When a group writes a manuscript, all authors should read and approve the final version of the submitted manuscript and its revision; and agree on the submission of manuscripts for this journal. All authors should have made substantial contributions to the concept and design of the research, acquisition of the data and its analysis, drafting the manuscript, and correcting the revision. All authors must be responsible for the work's quality, accuracy, and ethics.

Ethics Author(s) must be obedient to the law and/or ethics in treating the object of research and pay attention to the legality of material sources and intellectual property rights.

Copyright If the manuscript is accepted for publication, the author(s) still hold the copyright and retain publishing rights without restrictions. For the new invention, authors must manage its patent before publication.

Open Access The journal is committed to free-open access that does not charge readers or their institutions for access. Readers are entitled to read, download, copy, distribute, print, search, or link to the full texts of articles, as long as not for commercial purposes. The license type is CC-BY-NC-SA.

Acceptance Only articles written in US English are accepted for publication. Manuscripts will be reviewed by editors and invited reviewers (double-blind review) according to their disciplines. Authors will generally be notified of acceptance, rejection, or need for revision within 1 to 2 months of receipt. Manuscripts will be rejected if the content does not align with the journal scope, does not meet the standard quality, is in an inappropriate format, or contains complicated grammar, dishonesty (i.e., plagiarism, duplicate publications, fabrication of data, citations manipulation, etc.), or ignoring correspondence in three months. The primary criteria for publication are scientific quality and significance. **Uncorrected proofs** will be sent to the corresponding author by system or email as .doc or .docx files for checking and correcting typographical errors. The corrected proofs should be returned in 7 days to avoid publication delays. The accepted papers will be published online in chronological order at any time but printed at the end of each month.

A charge Authors are charged USD 400 (IDR 6,000,000). Additional charges may be billed for language improvement, USD 75-150 (IDR 1,000,000-2,000,000). **Reprints** The sample journal reprint is only available by special request. Additional copies may be purchased when ordering by email and sending back the uncorrected proofs.

Manuscript preparation Manuscript is typed on A4 (210x297 mm²) paper size, in a single column, single space, 10-point (10 pt) Times New Roman font. The margin text is 3 cm from the top, 2 cm from the bottom, and 1.8 cm from the left and right. Smaller lettering sizes can be applied in presenting tables and figures (9 pt). Word processing program or additional software can be used; however, it must be PC compatible, use the template, and be Microsoft Word based (.doc or .rtf; not .docx). **Scientific names** of species (incl. subspecies, variety, etc.) should be written in italics, except in italicized sentences. Scientific names (genus, species, author) and cultivar or strain should be mentioned completely for the first time mentioning it in the body text, especially for taxonomic manuscripts. The genus name can be shortened after the first mention, except in early sentences, or where this may generate confusion; name of the author can be eliminated after the first mention. For example, *Rhizopus oryzae* L. UICC 524 can be written hereinafter as *R. oryzae* UICC 524. Using trivial names should be avoided. **Biochemical and chemical nomenclature** should follow the order of the IUPAC-IUB. For DNA sequences, it is better to use Courier New font. Standard chemical abbreviations can be applied for common and clear used, for example, completely written butilic hydroxyl toluene (BHT) to be BHT hereinafter. **Metric measurements** should use IS denominations, and other systems should use equivalent values with the denomination of IS mentioned first. A dot should not follow abbreviations like g, mg, mL, etc. Minus index (m⁻², L⁻¹, h⁻¹) suggested being used, except in things like "per-plant" or "per-plot." **Mathematical equations** can be written down in one column with text; in that case, they can be written separately. **Numbers** one to ten are written in words, except if it relates to measurement, while values above them are written in number, except in early sentences. The fraction should be expressed in decimal. In the text, it should be used "%" rather than "percent." Avoid expressing ideas with complicated sentences and verbiage/phrasing, and use efficient and effective sentences.

The title of the article should be written in compact, clear, and informative

sentence, preferably not more than 20 words. Name of author(s) should be completely written, especially for the first and the last name. **Name and institution** address should also be completely written with street name and number (location), postal code, telephone number, facsimile number, and email address. We choose local names in Bahasa Indonesia for universities in Indonesia. The mention of "strata" program, should be avoided. Manuscript written by a group, author for correspondence along with address is required (marked with "¶"). **The title page** (first page) should include title of the article, full name(s), institution(s) and address(es) of the author(s); the corresponding authors detailed postage and e-mail addresses (P), and phone and fax numbers (O).

Abstract A concise abstract is required (about 200 words). The abstract should be informative and state briefly the aim of the research, the principal results and major conclusions. An abstract is often presented separately from the article, thus it must be able to stand alone (completely self-explanatory). References should not be cited, but if essential, then cite the author(s) and year(s). Abbreviations should be avoided, but if essential, they must be defined at their first mention. **Keywords** are about five words, covering scientific and local name (if any), research themes, and special methods used; and sorted from A to Z. **Abbreviations** (if any): All important abbreviations must be defined at their first mention there. **Running title** is about five words.

Introduction is about 600 words, covering the aims of the research and provide an adequate background, avoiding a detailed literature survey or a summary of the results. **Materials and Methods** should emphasize on the procedures and data analysis. **Results and Discussion** should be written as a series of connecting sentences, however, for a manuscript with long discussion should be divided into subtitles. Thorough discussion represents the causal effect mainly explains why and how the results of the research were taken place, and do not only re-express the mentioned results in the form of sentences. **Concluding** sentence should be given at the end of the discussion. **Acknowledgements** are expressed in a brief; all sources of institutional, private and corporate financial support for the work must be fully acknowledged, and any potential conflicts of interest are noted.

Figures and Tables of a maximum of three pages should be clearly presented. The title of a picture is written down below the picture, while the title of a table is written above the table. Colored figures can only be accepted if the information in the manuscript can lose without those images; the chart is preferred to use black and white images. The author could consign any picture or photo for the front cover, although it does not print in the manuscript. All images property of others should be mentioned the source. Author is suggested referring to Wikipedia for international boundaries and Google Earth for satellite imagery. If not specifically mentioned, it is assumed to refer to these sources. **There is no appendix**, all data or data analysis is incorporated into Results and Discussions. For broad data, it can be displayed on the website as a supplement.

References Preferably 80% of it comes from scientific journals published in the last 10 years. In the text, give the author names followed by the year of publication and arrange from oldest to newest and from A to Z; in citing an article written by two authors, both of them should be mentioned; however, for three and more authors only the first author is mentioned followed by et al. For example, Saharjo and Nurhayati (2006) or (Boonkerd 2003a, b, c; Sugiyarto 2004; El-Bana and Nijs 2005; Balagadde et al. 2008; Webb et al. 2008). Extent citation should be avoided, as shown with the word "cit." Reference to unpublished data and personal communication should not appear in the list but should be cited in the text only (e.g., Rifai MA 2007, pers. com. (personal communication); Setyawan AD 2007, unpublished data). In the reference list, the references should be listed in alphabetical order. Names of journals should be abbreviated. Always use the standard abbreviation of a journal's name according to the **ISSN List of Title Word Abbreviations** (www.issn.org/2-22661-LTWA-online.php). Please include DOI links for journal papers. The following examples are for guidance.

Journal:

Saharjo BH, Nurhayati AD. 2006. Domination and composition structure change at hemic peat natural regeneration following burning; a case study in Pelalawan, Riau Province. *Biodiversitas* 7: 154-158. DOI: 10.13057/biodiv/d070213.

The usage of "et al." in long author lists will also be accepted:

Smith J, Jones M Jr, Houghton L et al. 1999. Future of health insurance. *N Engl J Med* 965: 325-329. DOI: 10.1007/s002149800025.

MERCULIO	583-597
Effect of <i>Curvularia andropogonis</i> infection on secretory tissues and phenylalanine ammonia-lyase enzyme of <i>Cymbopogon nardus</i> L. ROFIATUN SOLEKHA, NI N. T. PUSPANINGRUM, AISYAH H. RAMADANI, FEBIANTI D. HAPSARI, DINI ERMAVITALINI, HERY PURNOBASUKI	598-604
Orchid diversity across different forest types on Mt. Malindang, Philippines YUNALYN LABAJO-VILLANTES, JIM COOTES, YI-BO LUO, OLGA M. NUNEZA	605-615
Population dynamics of mud clam <i>Geloina expansa</i> (Mousson, 1849) in degraded mangrove area at Kendari Bay, Indonesia BAHTIAR BAHTIAR, MA'RUF KASIM, YUSTIKA INTAN PERMATA HATI, ERMAYANTI ISHAK	616-623
Diversity and abundance of phytoplankton in Bone Bay, South Sulawesi, Indonesia and its relationship with environmental variables RAHMADI TAMBARU, ANDI I. BURHANUDDIN, ABDUL HARIS, MUHAMMAD A. AMRAN, ARNIATI MASSINAI, AMIR HAMZAH MUHIDDIN, KHUSNUL YAQIN, FIRMAN, YULIANA	624-631
Benthic macroinvertebrates as bioindicators to detect the level of water pollution in the upstream segment of Brantas River Watershed in Malang, East Java, Indonesia ASUS MAIZAR SURYANTO HERTIKA, SRI SUDARYANTI, MUHAMMAD MUSA, KASYFUL AMRON, RENANDA BAGHAZ DZULHAMDHANI SURYA PUTRA, MUHAMMAD ASNIN ALFARISI, M. ROSYIDI HIDAYAT, MAYA PERTIWI, MARSA FATIN HALIMAH	632-643
Mangrove distribution to support biodiversity management in Teluk Bintuni District, West Papua, Indonesia PETRUS KASIHAW, RONI BAWOLE, JONNI MARWA, AGUSTINUS MURDJOKO, ALEXANDER WIHYAWARI, YUNO HEIPON, REINARDUS LIBORIUS CABUY, NITHANEL MIKAEL HENDRIK BENU, FRANCINE HEMATANG, NICOLAUS Y. LEFTUNGUN	644-653
High-quality genomic DNA extraction methods of Yellow <i>Spathoglottis</i> Blume complex for next-generation sequencing JASIM HAIDER MAHMUD JASIM, AHMAD SOFIMAN OTHMAN, FARAH ALIA NORDIN, NURUL SHAKINA MOHD TALKAH	654-663
Community livelihood assets of forest village management in Nanga Lauk Village, Kapuas Hulu District, West Kalimantan, Indonesia EMI ROSLINDA, PEDRO SABATHINO, YOGI ANDITIYA PRATAMA, SUPRIADI, JULIANA EVA	664-672
Abundance assessment of Sulawesi Banded Swallowtail, <i>Papilio gigon gigon</i> and availability of resource plants in Bantimurung Bulusaraung National Park, South Sulawesi, Indonesia TAUFIQ ISMAIL, RISMA ILLA MAULANY, PUTU OKA NGAKAN	673-682

First report of <i>Pyricularia oryzae</i>, the cause of blast disease in upland rice, in Lombok, West Nusa Tenggara, Indonesia	683-689
IRNA IL SANURIZA, DEWA NGURAH SUPRAPTA, RETNO KAWURI, NI LUH SURIANI, I MADE SUDANTHA, IRFAN JAYADI, KHAERUL IHWAN	
The relationship between crustacean diversity and population dynamics of Blood Cockle <i>Tegillarca granosa</i> in the coastal area of West Langsa, Aceh Province, Indonesia	690-699
MAWARDI, M. ALI SARONG, SUHENDRAYATNA, MUHAMMAD IRHAM	
Exploring the antibacterial activity of endophytic bacteria from Andaliman (<i>Zanthoxylum acanthopodium</i> DC.) against <i>Bacillus subtilis</i>	700-707
DEBIE RIZQOH, SIPRIYADI, UTARI HARTATI SURYANI, CINTYA NABILA PUTRI, MEUTIA AGUSTIN, HERNITA TAURUSTYA, NOVRIANTIKA LESTARI, MARDHATILLAH SARIYANTI	
Effect of substrates of transplantation of the rare epiphytic orchid <i>Dendrobium farmeri</i> for conservation	708-715
ANCHALEE NUAMMEE, THITIPORN PINGYOT, SIRIYAKORN FOOWAN, SUPALAK PUMIKONG, WIRATA RUJICHAIPIMON, SUJINDA SORNPOOD, PRATEEP PANYADEE	
Fruit bats trade in the traditional markets of South Minahasa, North Sulawesi, Indonesia	716-725
TILTJE ANDRETHA RANSALELEH, MARTHA KAWATU, INDYAH WAHYUNI, JANE ONIBALA, MEIS JACINTA NANGOY, SINTYA UMBOH, UNSTAIN NWJ REMBET, SURYO SAPUTRO, SIGIT Wiantoro	
Conserving dipterocarp biodiversity in remnant forests of small islands in Batam Island, Indonesia	726-733
ARIDA SUSILOWATI, KESUMA WIJAYA, MAWAZIN, HENTI HENDALASTUTI RACHMAT, YUNITA LISMAYATI, HERI KURNIAWAN, IDA MALLIA GINTING	
Short Communication: Analysis of simple sequence repeats variations for the assessment of genotypic diversity in <i>Centella asiatica</i> (L.) Urb.	734-741
ANSHARY MARUZY, RATNA SUSANDARINI	
The first report of DNA barcoding of commercially important fish in Nias Islands, Indonesia	742-753
MUTIA RAMADHANIATY, VINDY RILANI MANURUNG, KHAIRUNNISA, FRIYUANITA LUBIS, IPANNA ENGGAR SUSETYA	
Surface runoff in varying forest cover types in Jangkok watershed, Lombok Island, Indonesia	754-762
MARKUM, FIRMAN ALI RAHMAN	
Phytochemical content and antioxidant capacity of ethyl acetate extracts from fifteen <i>Orthosiphon aristatus</i> leaves genotypes	763-769
RAISADIBA PUTRI BOVANI, NOVIAN LIWANDA, IRMANIDA BATUBARA, LAKSMI AMBARSARI, WARAS NURCHOLIS,	
Growth and mortality model of Chacunda gizzard shad <i>Anodontostoma chacunda</i> (Bleeker, 1852) in Tarakan waters, North Kalimantan, Indonesia	770-780
GAZALI SALIM, AGUS INDARJO, MUJIYANTO MUJIYANTO, YAYUK SUGIANTI, SUTRISNO ANGGORO, JULIAN RANSANGAN, DAUD NAWIR, MEIRYANI, SITTI HARTINAH, NURJANAH, ARIEL E SAN JOSE, ROSE DEWI, ZULAIHA BALQIS, MOCHAMAD CANDRA WIRAWAN ARIEF, MASAYU RAHMIA ANWAR PUTRI, ABDUR RAHMAN	
Vegetation diversity and habitat suitability modeling of the invasive plant <i>Bellucia pentamera</i> in conservation forests of West Sumatra, Indonesia	781-791
SOLFIYENI SOLFIYENI, ADLI FADHLAN, AL AZIZ, GITO SYAHPUTRA, ANISA AZZAHRA, MILDAWATI MILDAWATI	
Fungal diversity associated with the decomposition of <i>Avicennia marina</i> leaf litter at various salinity levels	792-800
YUNASFI, IPANNA ENGGAR SUSETYA, BUDI UTOMO, AFIFUDDIN DALIMUNTHE, SAMSURI, ANITA ZAITUNAH	

Comparison of morphological characters, flowering phenology and essential oils of two accessions of <i>Cananga</i> (<i>Cananga odorata</i> var. <i>fruticosa</i>)	801-810
MUTMAINNATUN NAFIS RABI'ATUN NA'IMAH, ANI KURNIAWATI, KRISANTINI	
Physicochemical and structural composition of black rice (<i>Oryza sativa</i>) flour from Java, Indonesia	811-818
NURHIDAJAH, DIODE YONATA, SUFIATI BINTANAH, BOBY PRANATA	
Combining eDNA metabarcoding and conventional method in rapid screening of fish diversity in Maros-Pangkep Global Geopark, South Sulawesi, Indonesia	819-828
AMBENG, MUHAMMAD IQRAM, MAGDALENA LITAAY, ZOHRAH HASYIM, WILMA J.C. MOKA, GEORGINA MARIA TINUNGKI	
Identification of the pest outbreak in the coastal mangrove ecosystem of Mahakam Delta, Indonesia	829-835
HARMONIS, MUHAMMAD TAUFIQ HAQIQI, MUHAMMAD FIRDAUS AL FAHRONI, JEFRY, SANTIKA GUNAWAN, MUHAMMAD AFIF SEKEDANG, DAVIS RAHMAT, NUR FARIZ AZHAR, MUHAMMAD OKY PRATAMA SEPTIAJI PUTRA, FITRIA DEWI KUSUMA, MARYA TIARA HAPSARI, FERNANDA ALVA MUHAMMAD, RITA DIANA, TRIYONO SUDARMADJI, RUDIANTO AMIRTA, ARIYANTO, OSHLIFIN RUCMANA SAUD, FENNY PUTRI MARIANI SOFYAN, FAJRIANSYAH, AGUS MASHUD S. ASNGARI, YULIUS S. BULO, IKHSAN SALMAN, RIFKI RIZALDI, KHAIRUL MUKMIN LUBIS	
Freshwater fish diversity from Siberut Island, a small island in the western part of Sumatra, Indonesia	836-845
